

# Accelerate ACO Success with CareSpace®

CareSpace® is an EHR agnostic, comprehensive AI-driven solution for ACOs (including ACO REACH, MSSP, and other risk-based models), seamlessly uniting advanced data analytics and AI-powered population health management.

Adapt to regulatory changes (V28, eCQMs and others) and make big strides in your VBC efforts.

- ✓ AI-driven care, quality, and cost management, coupled with risk adjustment capabilities, all within a single SAAS solution.
- ✓ Combining our data and clinical expertise honed over 15 years in healthcare, we deliver a Data Fabric with thousands of data elements and measures purpose-built to provide fast time to value.
- ✓ Our deep clinical knowledge and insights are seamlessly integrated throughout the platform, providing actionable insights at the point of care.

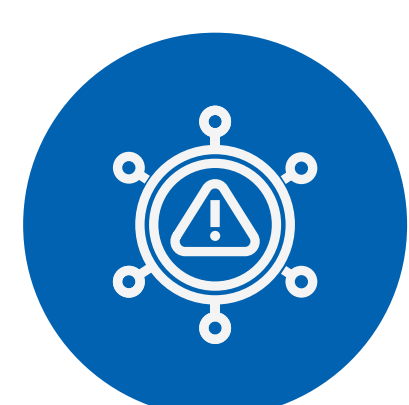

## Data Management

Gather, curate, normalize the data across all sources including SDOH.

## Care Management/Coordination

Follow the patient across the entire continuum of care.

## Risk Adjustment and Stratification

Automate risk adjustment/stratification and uncover new opportunities.

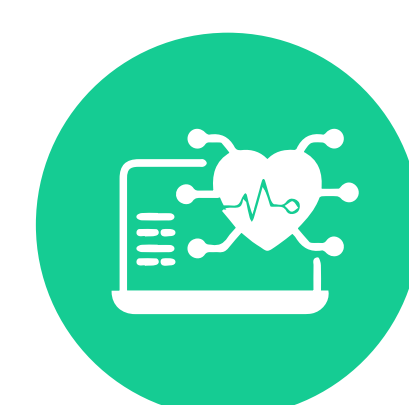

## Cost/Utilization Management

Get an in-depth analytic view into the entire population. Keep track of costs and resources with ad-hoc analytics capabilities.

## Quality Management

Measure, improve and report quality covering all measures.

## Provider Engagement

Get AI-driven actionable insights at the point of care with bidirectional connectivity into EHRs.

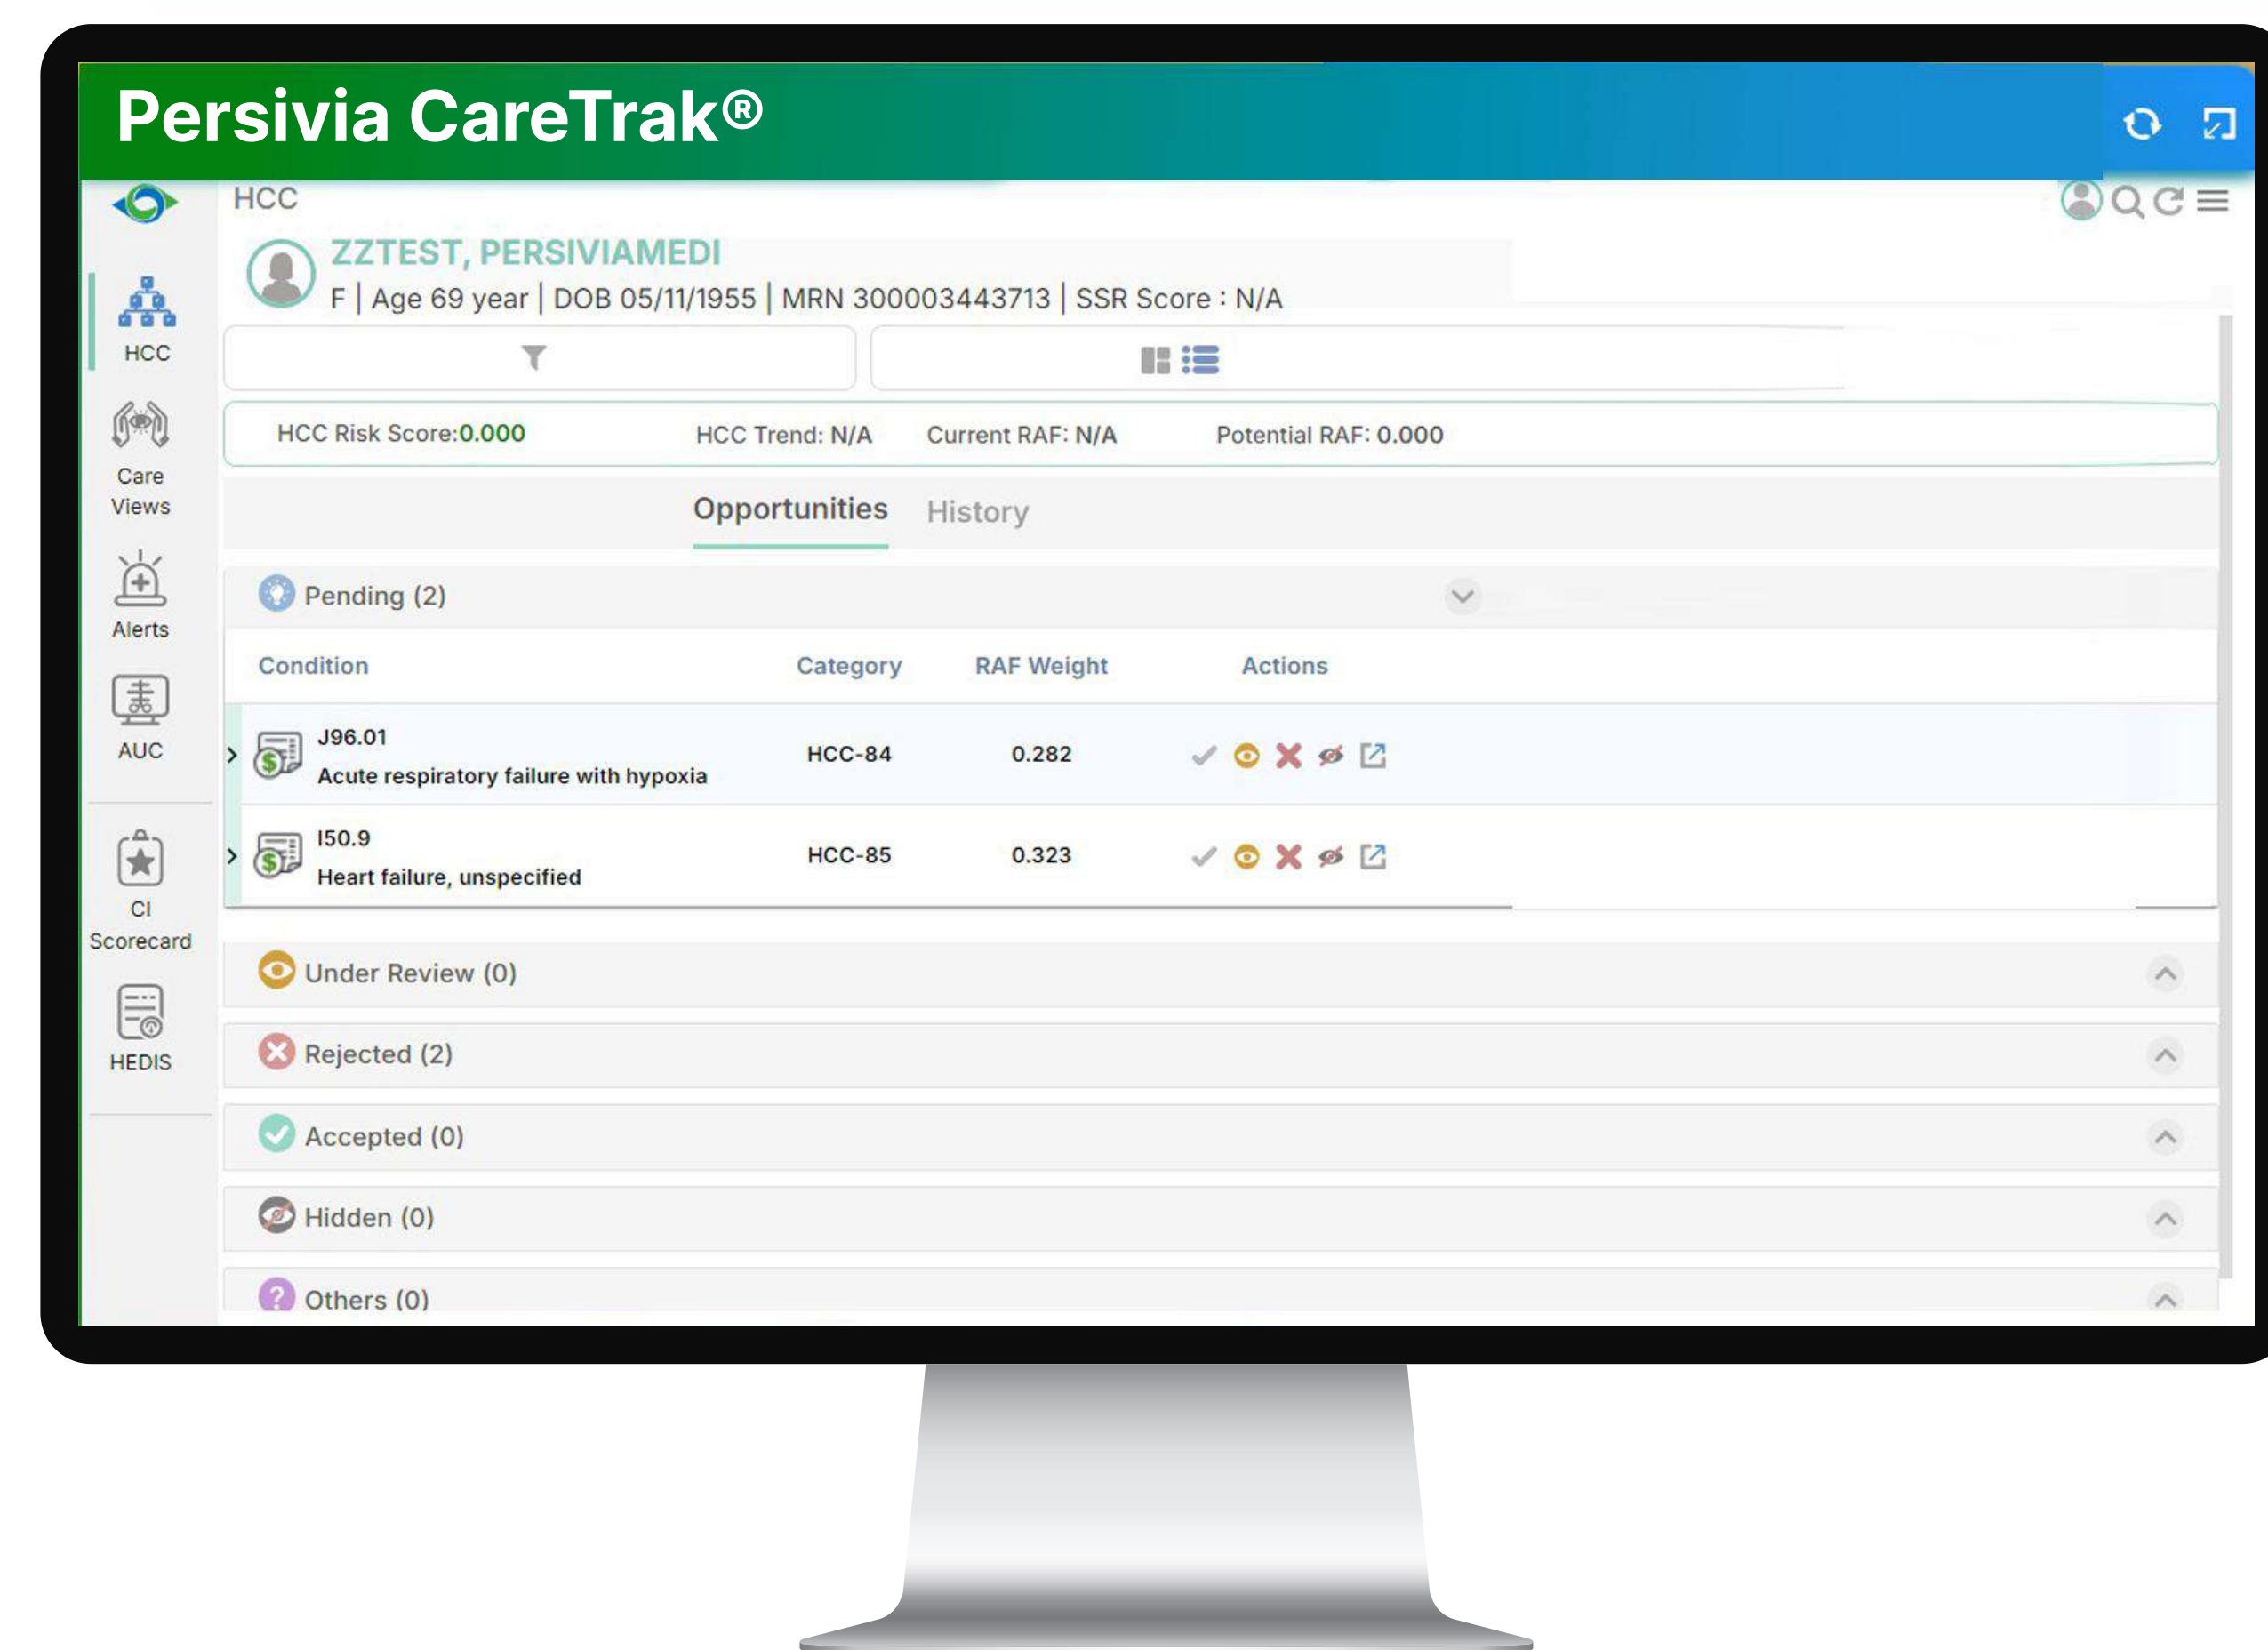

## Actionable Insights at the Point of Care

Persivia CareTrak®, the EHR extension, connects bi-directionally with all major EHRs and delivers a comprehensive patient picture and AI-driven clinical insights at the point of care.

It work directly into provider's workflow and gives them the peace of mind to improve care decisions and patient outcomes during the patient encounter.

From HCC coding, quality care gaps, program enrolment, pre-visit planning, to messaging, CareTrak® brings all that providers need at their fingertips.
