An Omni Channel Approach to Care Delivery

Persivia CareSpace® is a secure cloud-based solution that leverages over a decade of experience of clinical rules engine and analytics to provide the right healthcare services, in the right order, at the right time, in the right setting, by the right providers. Manage **Coding**, **Cost**, **Care**, and **Quality** with a unified, comprehensive platform.

Data integration

Incorporate all patient data (clinical, claims, patient reported, device and socio-economic data) into a single longitudinal patient record. Get Realtime Access to data.

AI-driven insights & analytics

AI & NLP helps generate highly relevant patient insights by mining unstructured data and combining it with structured data.

Personalized care plans

Capture information from disparate sources and auto generates patient specific, configurable Care Plans.

Care gaps

AI-driven identification of clinical and service care gaps specific to each value-based care program.

Risk stratification

3rd generation Risk Stratification capabilities that bring claims, clinical and social determinants of health data together.

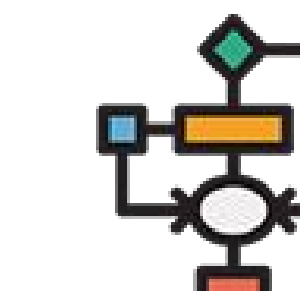

Point of care integration

Present patient specific evidence based clinical interventions at the point of care.

Patient outreach

Facilitate patient Engagement using the portal and Apps. AI guided interactions, assessments and communication.

Workflow integration

Incorporates seamlessly with your existing operational workflows with minimal disruption.

Advanced cost and utilization analytics

Reduce Total Cost of Care, overall utilization, ED visits, referral outside the system.

Resource prioritization

Streamlined workflows for efficiency in managing Care Management resources.

Telehealth

Telehealth integration within the platform facilitates non face-to-face patient encounters with video calls and billing.

Multi-channel communication

Providers & patients can communicate with real-time text, audio and video call options.

Persivia is the only vendor that integrates clinical decision support and chronic care management at the point of care which will positively impact our patients overall care management. The additional revenue generated by the CMS CCM program will be an added bonus for the practice.
