# Work with a Dedicated Quality Advisor

Every client, guided by a dedicated Quality Advisor, navigates seamlessly from Measure Selection to Measure Reporting to qualify for exemplary bonuses.

- Works closely with you to map each data point
- Available 24/7 for discussions on regulatory compliance
- Ensures accurate interpretation and representation of all program requirements

# Our Al Engine powers your Quality & Care Outcomes

Our Al-Driven integrated platform reduces the administration burden of reporting to multiple programs by streamlining the reporting rocess.

Hospitals and providers can address quality and cost improvements, and easily drill down on population and individual patient information for flexible data access. It can be easily incorporated into existing clinical workflows with no disruption.

#### Capturing data

across all data sources, normalizing it, and making it actionable.

#### Identifying and automating work flows

to better manage tasks, goals, caregaps and assessments to improve quality

**Intuitive Dashboards** with drill-down capabilities.

#### Performing measure calculations

covering eCQMs, HEDIS, ACO, Commercial, Promoting Interoperability, Chart Abstracted, and other measure groups.

### submit quality measure and supplemental data

to CMS, commercial payers, and the Joint Commission.

"The Persivia team provides us unbelievable service. Mapping and training is done on personal level based on your skills.
