

Improving Care & Cost Outcomes for Speciality ACOs

Persivia empowers Specialty ACOs with an AI-driven population health solution, facilitating whole-person, longitudinal care to enhance care standardization, pathways, and coordination.

By harnessing extensive patient data from diverse sources and leveraging a robust data fabric enriched with thousands of data elements and deep clinical knowledge, we provide actionable insights to providers at the point of care.

Persivia's CVD Specialty Care Program

One of our flagship offerings is the CVD Specialty Care Program, designed to provide tailored cardiovascular disease (CVD) care recommendations to providers, care managers, and patients precisely when they need it most

KEY BENEFITS

- 1** Seamlessly coordinate care pathways and services.
- 2** Instant access to actionable insights at the point of care.
- 3** Personalized cardiovascular care recommendations.
- 4** Proactive risk identification to reduce costs and improve outcomes.
- 5** Automate referrals and streamline care team collaboration.
- 6** Close collaboration with clients to identify care handoffs and automate referrals among team members.
- 7** Standardize risk assessments for optimal member management.
- 8** Gain deeper insights into disease populations and their management impact with physician dashboards.
- 9** Ensure smooth care transitions with comprehensive TCM programs.
