“There was a need to design a screening tool, establish community partnerships and a bidirectional communication flow to enhance care coordination between all care providers, including post acute. After ... we determined only Persivia had the platform to enable this level of coordination.”

Dr. Ahmad Imran, MD, MBA, VP Value Based Care

The Power of Persivia

Persivia delivers a highly configurable AI-driven end-to-end digital health platform, with no third parties involved.

It is designed to bring together data, care, cost, quality, and risk for healthcare organizations to deliver the best cost and care outcomes.

Driving over a decade of clinical excellence alongside IT innovation. Let's connect!
