- Hype Cycle for Healthcare Data, Analytics and AI, **(2024)**

Executive Summary

Persivia is a leading healthcare IT provider, recognized for its innovative use of AI, data analytics, and workflow automation to improve care management and patient outcomes. Consistently highlighted by Gartner® for its contributions, Persivia's platforms empower providers and payers to deliver high-quality, value-based care. With a focus on advancing healthcare technology, Persivia is shaping a more efficient and patient-centered healthcare landscape.

Market Guide for Health Data Management Platforms

Persivia recognized for its Health Data Platform. This comprehensive report analyzes vendors offering health data management platforms, highlighting key capabilities, trends, and best practices for effective data handling and integration.

Best Practices to Maximize the Value of Digital Health Platforms

Persivia recognized for its healthcare specific packaged business capabilities available as SAAS solution. According to Gartner " Persivia's CareSpace has a suite of capabilities, including personalized care plans, that captures information from disparate sources and autogenerates patient-specific, configurable care plans." This report presents actionable steps for healthcare organizations to optimize digital health investments, focusing on patient engagement, operational effectiveness, and sustainable growth.

Hype Cycle for Healthcare Providers, 2024

For the second time in a row **Persivia recognized for its Population Health Solution.** This report highlights innovative technologies transforming healthcare providers, showcasing their potential for care delivery improvement and patient satisfaction.

U.S. Payer and Provider CIOs: Apply AI in Care Management Programs

Persivia recognized for its AI-enabled solutions. This expert guide offers actionable strategies for leveraging artificial intelligence to enhance care management, improve patient outcomes, and optimize operational efficiency.

Hype Cycle for U.S. Healthcare Payers, 2024

Persivia recognized for its Population Health Solution. This report assesses the maturity and adoption of technologies relevant to U.S. healthcare payers, providing insights into emerging trends, risks, and potential impacts.

Hype Cycle for Healthcare Data, Analytics and AI, 2024

Persivia recognized for its Population Health Solution. This analysis examines the maturity and impact of data, analytics, and AI technologies in healthcare, highlighting innovations driving data-driven decision-making.

Provider Analytics Strategy for U.S. Healthcare Payer CIOs

Persivia recognized for its Population Health Solution. This strategic guide provides expert advice on building effective analytics strategies, focusing on improved decision-making, cost reduction, and value-driven collaborations.

Hype Cycle for U.S. Healthcare Payers, 2023

Persivia recognized for its Population Health Solution. This report analyzed the evolution of technologies for U.S. healthcare payers, focusing on emerging innovations.

Hype Cycle for Healthcare Providers, 2023

Persivia recognized for its Population Health Solution. This analysis reviewed key technologies affecting healthcare providers, emphasizing their roles in improving patient care and organizational sustainability.

Hype Cycle for Healthcare Data, Analytics and AI, 2023

Persivia recognized for its Population Health Solution. This report evaluated the progression of healthcare data, analytics, and AI technologies.

About Gartner

Gartner is a leading research and advisory company that provides insights, advice, and tools for businesses in various industries, particularly in the fields of IT, marketing, and customer service. Founded in 1979, Gartner is well-known for its research reports, including the "Magic Quadrant" and "Hype Cycle," which help organizations make informed decisions about technology and business strategies.

Gartner's Core Focus

Gartner is committed to empowering organizations with objective and actionable insights that drive effective decision-making. The company achieves this by providing in-depth research and analysis on technology trends, market dynamics, and industry best practices. This comprehensive approach supports leaders in strategic planning, technology selection, and innovation. Gartner's evidence-based insights and forecasts are designed to guide organizations through complex decisions and help them navigate evolving technological landscapes with confidence and clarity.

Customer Comments

With a huge success in the consolidation of the multiple EHR and claims data feeds and the multiple eCQM programs under our belt, we shifted focus to the care coordination, care management and analytics side, being mindful to still meet our interoperability goals while maintaining superior service to our patient population. With Persivia's complete delivery of a single platform solution, our clinicians have less 'clicks' to get at a true longitudinal medical record view of a patient right at the point of care. CareSpace® is now our population health operating system that works in close conjunction with our system wide Cerner and 20 ambulatory EHRs.

- CEO McLaren Physician Partners

"Persivia team has made sure we are able to successfully attest to Meaningful Use (PI3) and the quality data reporting (eCQM) each year. Our relationship has grown through the years and you put us at ease with quick responses to all our CMS questions".

**Director of Applications & Information Technology
St. John's Riverside Hospital**

"CareSpace® is an amazingly effective product. We have tried numerous population health management tools and none come close to the capabilities of CareSpace®. Our care managers love the system. We were able to go from contract signing to live in under 30 days. Persivia implemented our custom forms and workflows in about a week and our care managers were trained in one day. Combined with CareSpace®'s deep analytics capabilities we have the perfect tool to manage all these programs".

- Medical Director of PMC

"We have been impressed with Persivia's ability to complete the first set of integrations, import the patient data, train our teams, implement custom workflows, and get the system deployed in under twelve weeks from contract signing".

-CEO of Sanitas Health Management Services

Prime Healthcare

"Persivia's solution has been a game changer for us. The ability to collect and normalize patient data from many different systems was a huge driver of our successful performance year one savings. The Persivia AI engine has been instrumental in our ability to focus on the most critical patient information whether it is identifying COVID patients or alerting physicians to critical gaps in care. Persivia is extremely forward thinking and has proven themselves to be an essential partner as our hospitals work towards their regulatory, quality and financial goals".
