

# Risk Adjustment in the TEAM Model

Risk adjustment in the TEAM model ensures fair comparison of healthcare providers by accounting for differences in patient populations and hospital characteristics.

## Risk Adjustment TEAM Model

## Optimize Your Risk Adjustment with Persivia's Advanced Solution

Our solution empowers healthcare providers to excel in the TEAM model by:

- Leveraging AI to accurately capture and analyze risk factors
- Providing real-time risk stratification for your patient population
- Offering intuitive dashboards for monitoring HCC capture and recapture rates
- Integrating seamlessly with your existing EHR systems for efficient workflow

Don't let complex risk adjustment challenges hinder your TEAM model performance. Let Persivia's advanced Risk Adjustment solution be your key to success.
