

CareTrak®: Full Patient view with Actionable Insights at the Point of Care

Executive Summary

Physicians spend up to 6 hours daily navigating EHR systems, falling short on delivering the best patient care. This time spent on administrative tasks directly impacts the quality of patient care. CareTrak® transforms this reality by serving as an AI-powered point-of-care solution that puts comprehensive patient data at providers' fingertips in a matter of minutes.

As a seamlessly integrated clinical decision support tool, Persivia CareTrak® empowers healthcare providers to make informed decisions efficiently while reducing administrative burden. By presenting a unified longitudinal patient record, consolidated from disparate sources, at the point of care, CareTrak® enables providers to close care gaps, complete pre-visit planning, and identify missing HCC opportunities instantly – leaving more time for meaningful patient interactions. Through its advanced AI capabilities and intuitive interface, CareTrak® not only streamlines workflows but also enhances the quality of care delivery, ultimately leading to better patient health outcomes and improved provider satisfaction.

Introduction

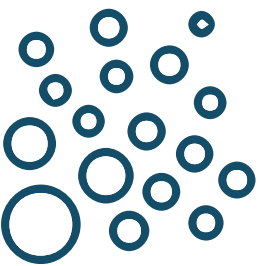

The heart of healthcare lies in the relationship between physicians and their patients. However, this crucial connection is increasingly fragmented by overwhelming administrative demands. Physicians face multiple challenges daily. The task of standardizing data from multiple sources and processing unstructured information further compounds these issues, leading to missed opportunities in risk adjustment and compromised care quality.

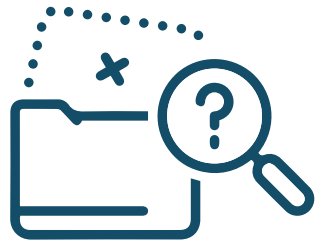

Healthcare Challenges Today

Current Challenges

63% of doctors overwhelmed

 Duplicate data entry

 Scattered Information

 Missing patient details

Impact on Care

 Missed preventive care

 Avoidable emergency visits

 Slower decisions

 Dissatisfied patients

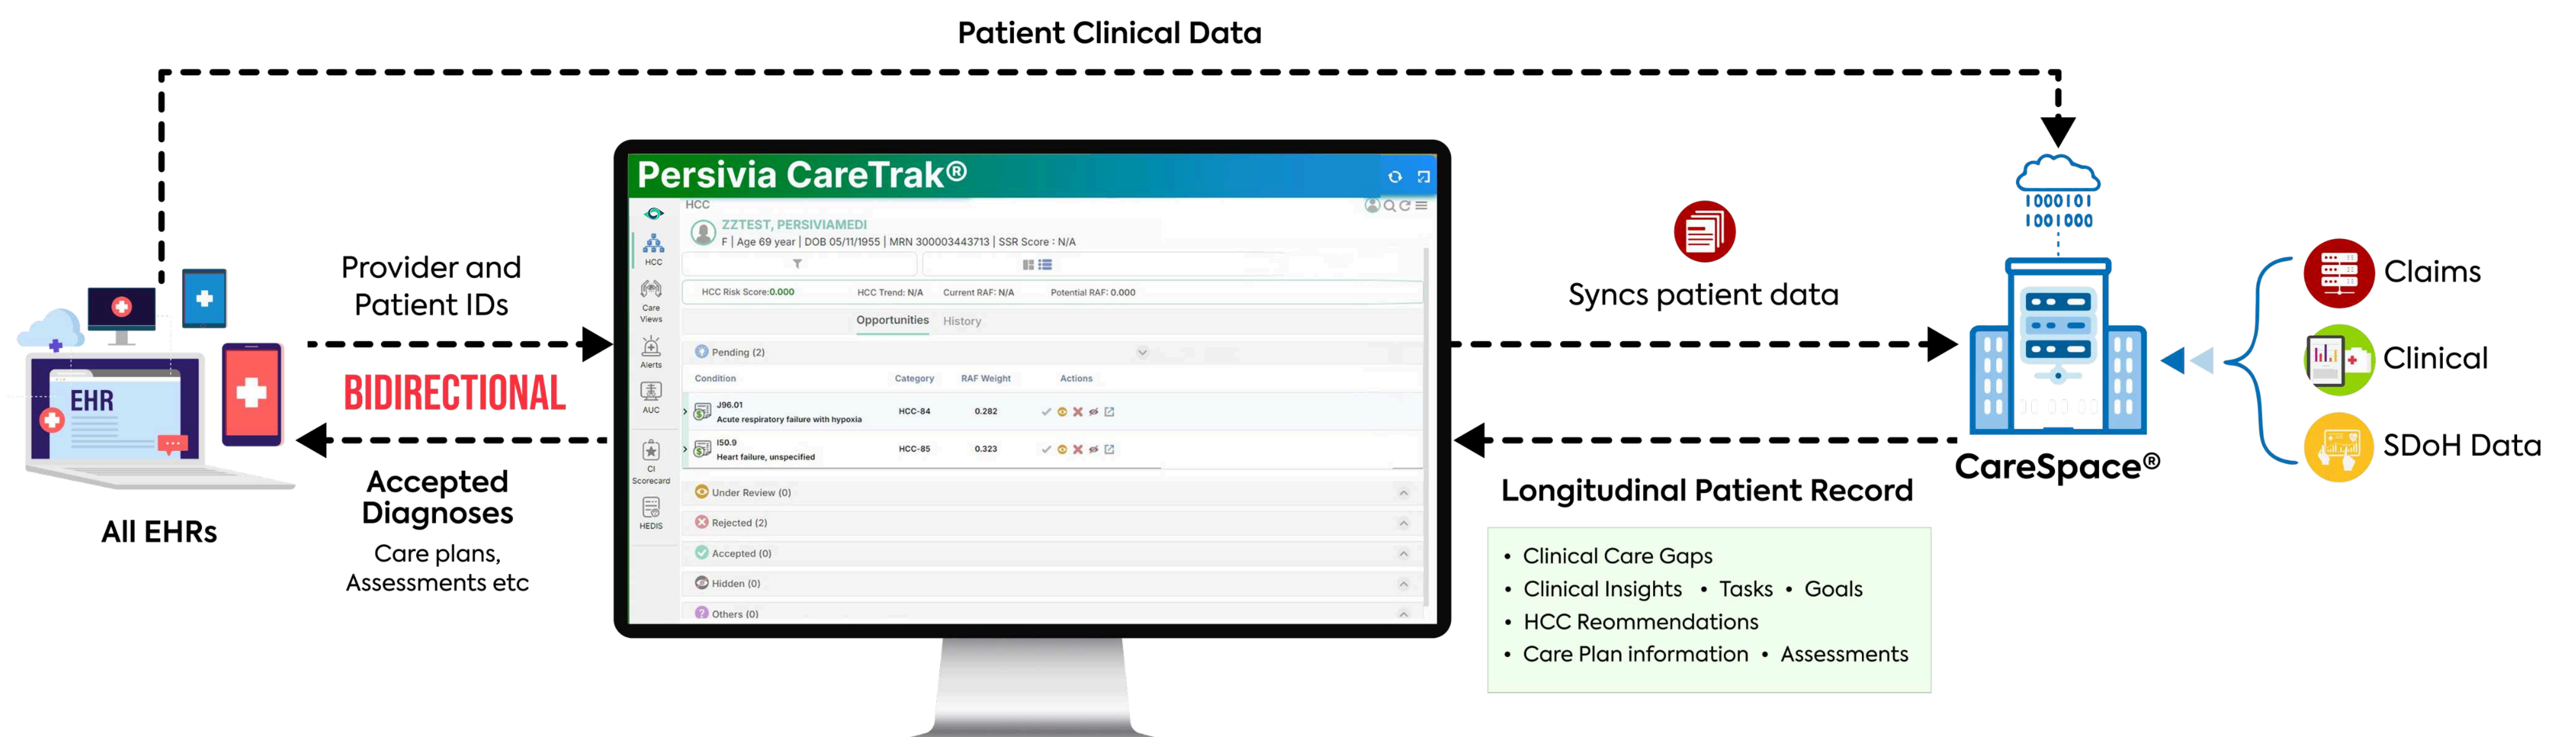

Healthcare providers need a unified solution at the point of care that enhances their existing EHR systems rather than replacing them. CareTrak® meets this need by seamlessly integrating with current EHR systems. It streamlines clinical workflows by using AI to deliver comprehensive patient insights instantly, helping physicians make informed decisions efficiently.

CareTrak®: AI-Powered Clinical Decision Support at the Point of Care

1

Persivia's CareTrak®:

Intelligence at the Point of Care

A Complete Patient Picture at Physicians' Fingertips

CareTrak® seamlessly integrates with any Electronic Health Record (EHR) system, providing physicians with a comprehensive view of their patients' health journey at the point of care. This EHR-agnostic solution eliminates the need for multiple logins and repetitive documentation, allowing providers to focus on what matters most—patient care.

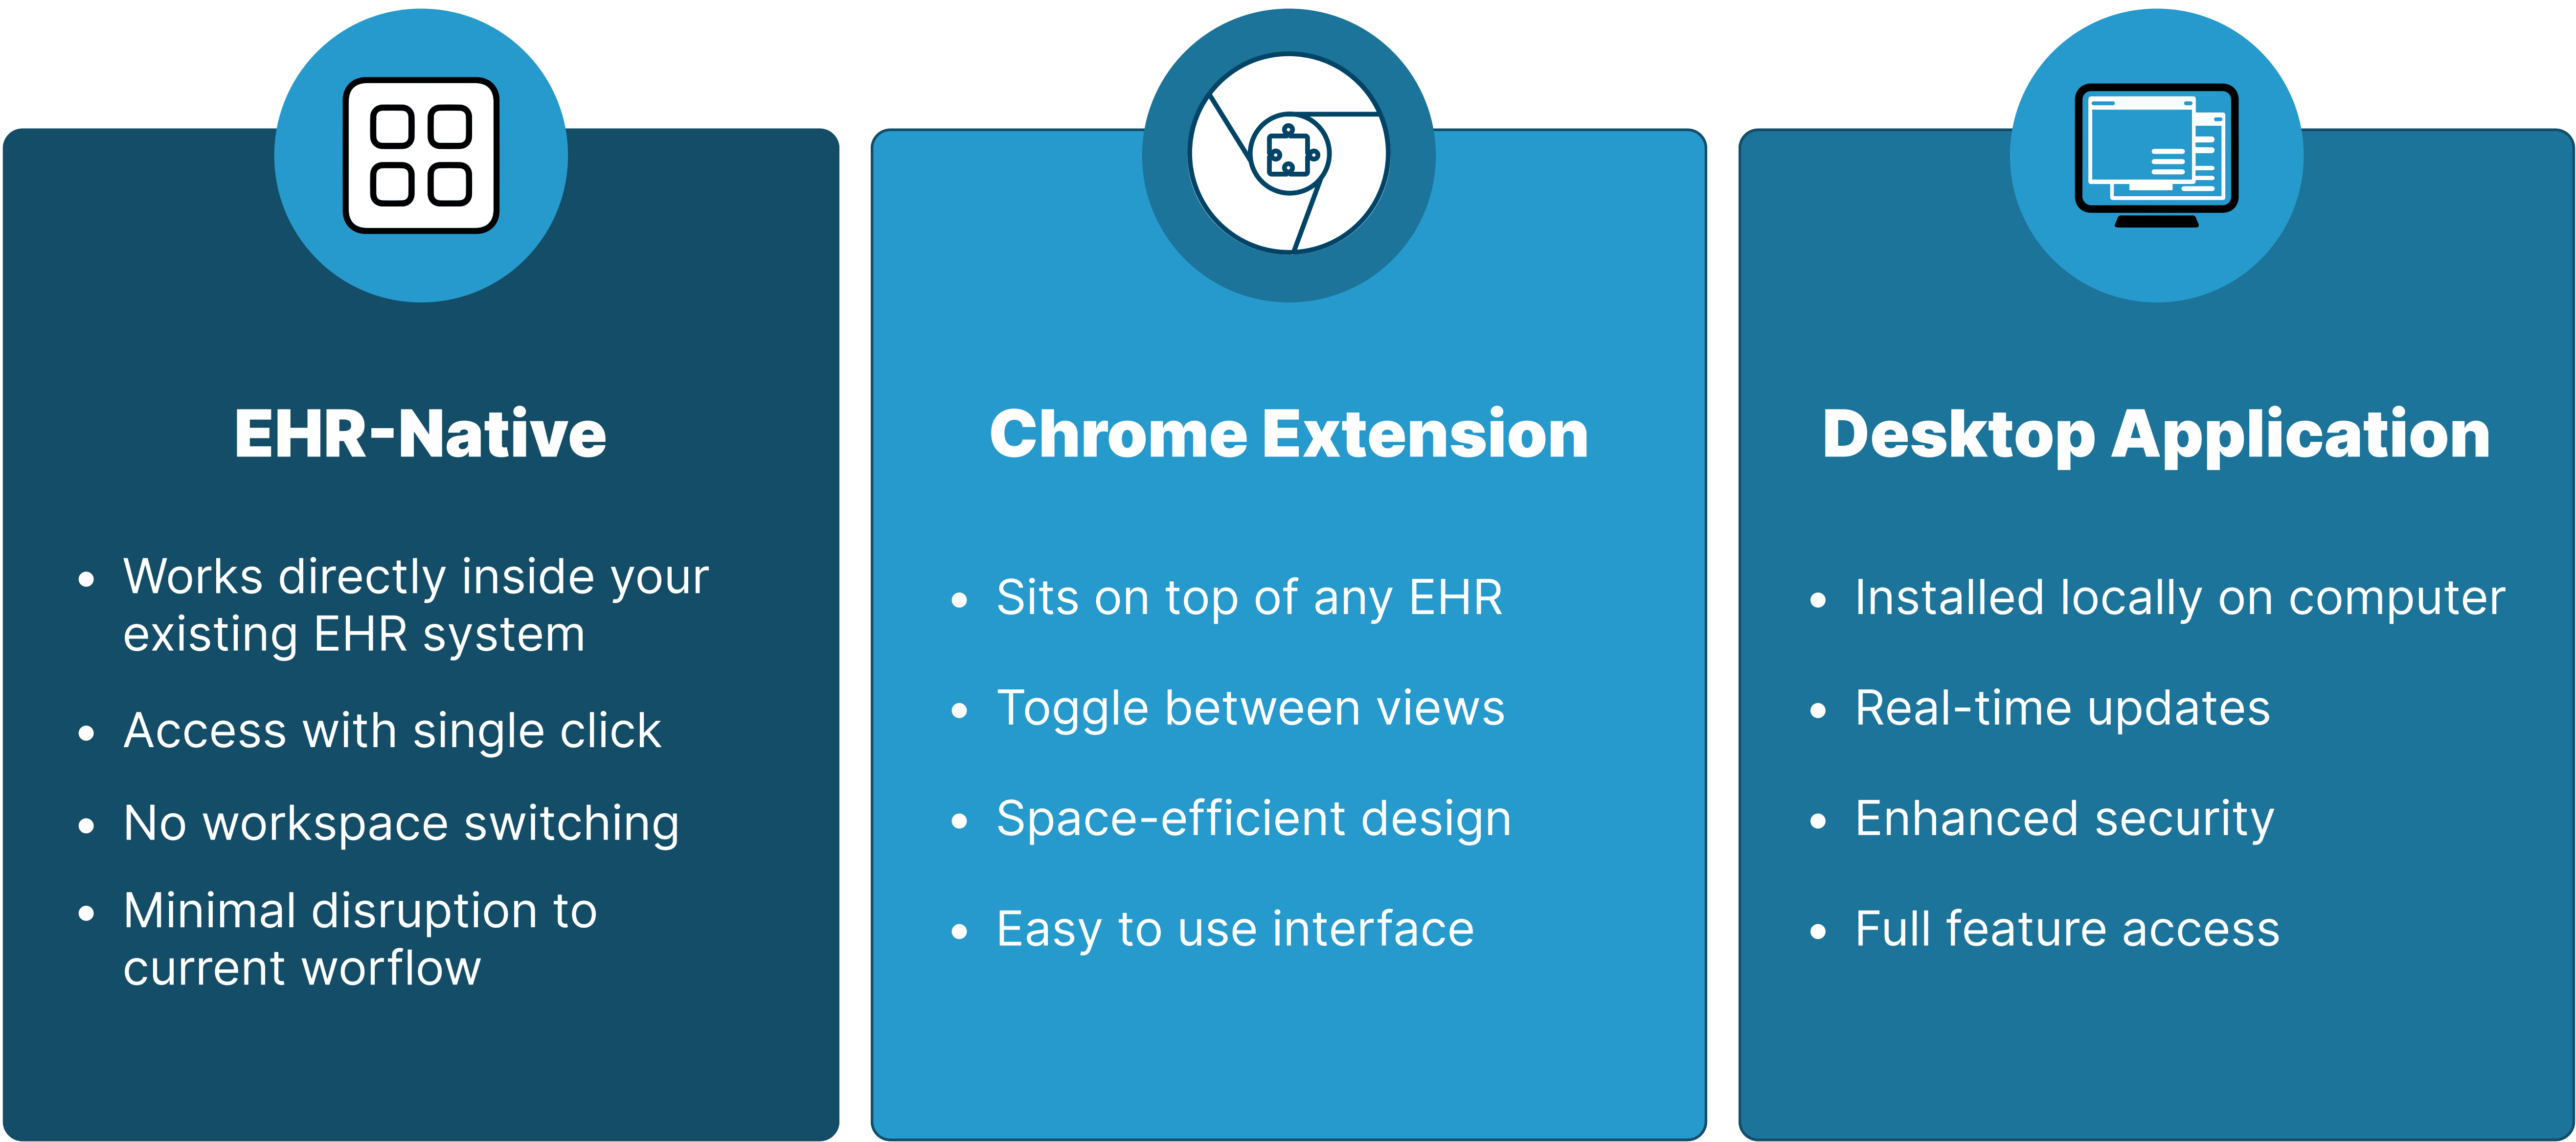

Unlike solutions that rely solely on data from a single EHR, CareTrak® consolidates information from multiple sources, including multiple EHRs, claims, gap files, ADT feeds, and more. By leveraging this unified data, CareTrak® delivers real-time, AI-driven insights that enhance clinical decision-making, reduce administrative burden, and streamline workflows—ultimately improving both provider efficiency and patient outcomes

**Bidirectional connectivity with
over 18 largest EHRs**

CareTrak® EHR Integration Methodology

CareTrak®'s EHR-agnostic integration framework seamlessly connects with virtually any EHR system through a sophisticated approach, ensuring healthcare providers have instant access to critical patient information.

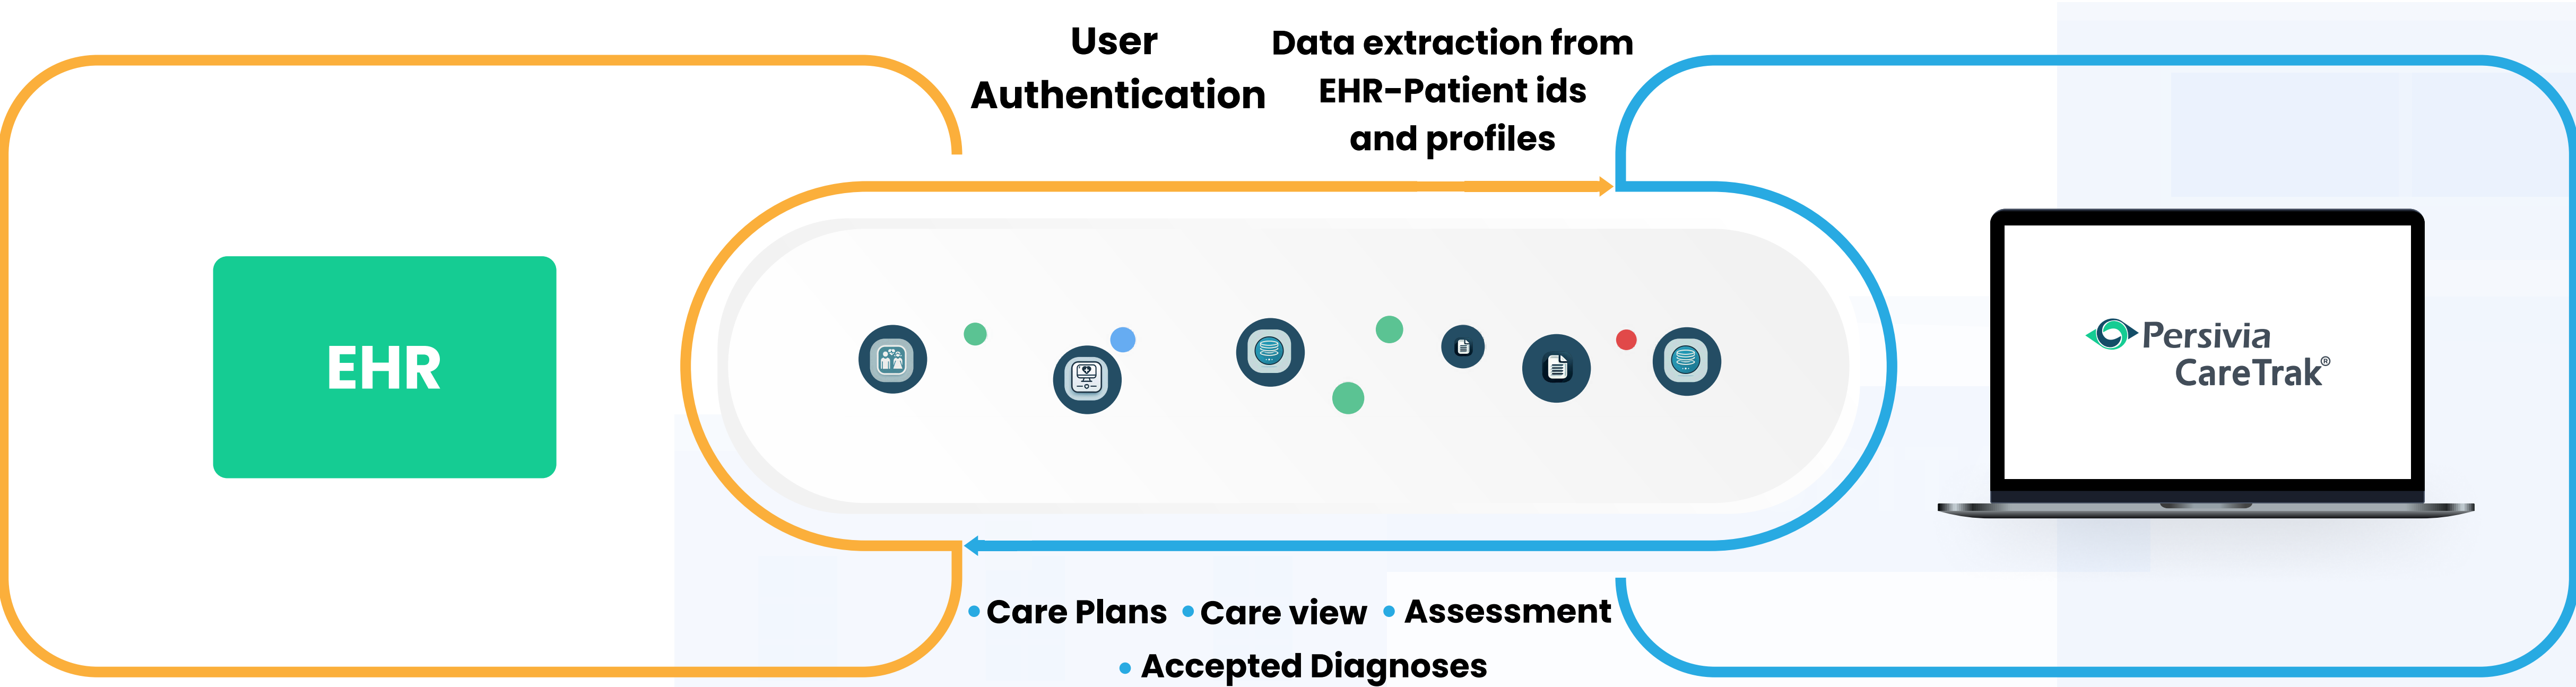

Bidirectional Connectivity

CareTrak® connects directly with major EHR systems (Centricity, CGM, CPSI, Cure MD, Cyfluent, eClinicalWorks, Elation, eMDS, eMedicalPractice, Cerner, Athena, EPIC, eCW, GEMMS, Lytec MD, Mac Practice, MC KESSON, Medical Notes, Medent, and Veradigm), allowing seamless two-way data exchange. This integration eliminates double documentation and ensures providers have instant access to accurate patient information, improving both workflow efficiency and care quality.

With Native Bidirectional Connectivity, CareTrak® writes back into your EHR

No more double documentation, no more burnout!

CareTrak® Modules

CareTrak® offers a flexible, modular approach to healthcare technology implementation, empowering organizations to activate only the specific modules that align with their needs and objectives. This customizable framework means healthcare providers aren't locked into a one-size-fits-all solution – instead, they can select and implement individual modules that address their unique challenges, scale their implementation over time, and maintain cost-effectiveness by investing only in the capabilities they'll actively use.

Flexible, Modular Approach - Choose what you need

Care Gaps

- AI-powered gap analysis
- Proactive care alerts
- Preventive care tracking

Care Plan

- Next-best-action guidance
- Evidence-based decisions
- Streamlined planning

HEDIS Scorecards

- Real-time performance metrics
- Population health tracking
- Detailed monitoring

Pre-Visit Planning

- Consolidated appointments
- HCC recommendations
- Organized alerts

Program Enrollment

- Easy enrollment management
- Status tracking
- Referral monitoring

Messaging

- Secure team communication
- CDI team collaboration
- Coordinated care delivery

EHR Integration Timeline

Task	Owner	Time
Kick-off call to a) Identify the data access method b) Access to EHR front-end c) Discuss the benefits and deliverables of the integration d) Understand the EHR documentation workflow of the practice users	Client & Persivia	1 Days
Provide access to data based on the agreed method	Client	5 Days
Provide EHR front-end access	Client	5 Days
Validate data and EHR front-end access	Persivia	1 Days
Extract and Load the data in CareSpace	Persivia	2 to 3 weeks (based on the type of data and its access)
Validate the data for the programs and modules enabled for the practice	Persivia	1 week
UAT sign-off from client	Client	1 week

Conclusion

In today's healthcare landscape, the divide between administrative demands and quality patient care continues to widen. CareTrak® bridges this gap by offering more than just another technology solution—it delivers a transformative approach that puts physicians back in control of their time and expertise.

By seamlessly integrating AI-powered intelligence with existing EHR systems, CareTrak® eliminates traditional friction points in healthcare delivery. The platform's ability to consolidate fragmented data, automate routine tasks, and deliver actionable insights at the point of care has proven invaluable across diverse healthcare settings.

The results are clear: improved provider satisfaction, enhanced patient care, and streamlined operations that drive better outcomes.
