

How did Persivia enable Florida Oak Hill Hospital to cut 30-day all-cause readmissions by 65%?

Real-time Insights from Persivia CareSpace® leads to a Dramatic Decrease in Readmissions

Challenges

Lack of communication between patients and care managers

Unsatisfied patients

High readmission Rate

High Cost

Achievements

 Reduction in readmissions
65%

 Total readmission cost
avoided **\$19M**

 Number of readmissions
avoided **1282**

Persivia's Swift Solutions

- 1 Enabled a multidisciplinary team with dynamic, longitudinal patient records.
- 2 AI-driven insights and alerts to support in-home assessments.
- 3 Linkages to social services and on-call PCP for post-discharged hospital patients.

Our Hospital Readmission Reduction program - Healthy Transitions was a resounding success, achieving a 65% reduction in readmissions. This demonstrates the power of data, the right use of technology, and our commitment to providing the best possible care for our patients. CareSpace® allowed us to gain valuable insights into our patients' health status and take timely interventions. It was a game-changer for us in terms of providing effective care coordination.
