

How Did Persivia's Automated Health Risk Assessment Impact Harmony Cares' Bottom Line?

A telehealth-based health risk assessment solution that resulted in more accurate risk scoring as well as improved operational efficiencies for staff

Covering
200+
Provider groups

11 States

Challenges

Existing EHR lacked care management, in-home evaluations, and risk adjustment workflows

Achievements

 HCC Pass Rate Improvement
85-100%

 Reduction in time for virtual HRA
Up to 50%

Persivia's Swift Solutions

1

Harmony Cares selected CareSpace®, a single integrated platform to launch an AI-supported patient evaluation solution with advanced care management capabilities

2

Integrated telehealth capability for in-home evaluations

3

Persivia supports 4 Value-Based Care Contracts for Harmony Cares

”

The benefit of integrating the two is the pass rate for HCC adjustments per assessment went from 85% to 100%.30% to 50% reduction in time needed to perform the assessment. For our providers, that was an enormous benefit, so they could see the patient and the record at the same time.
