

How Prime Healthcare Earned National Recognition with Persivia CareSpace®?

A single comprehensive Population Health solution to integrate multiple EHRs

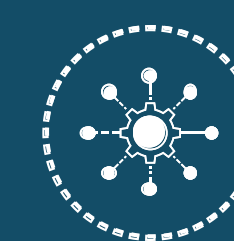

46
Hospitals

10K
Patients

2 Quality
Programs

7 VBC
Contracts

300
Outpatient
locations

Challenges

Unmet vendor's need to guide Prime's alternate VBC models within their ACO program

Significant client expansion across Medicare Advantage for both Risk Adjustment and HEDIS analytics

Persivia's Swift Solutions

1

A single integrated AI platform to support

- Care coordination & management
- Risk Stratification
- Risk Adjustment
- Cost Analytics
- Registries
- Episodic Models
- HEDIS

2

Standardized data across the network

Achievements

National recognition: Won the 20th Eisenberg Patient Safety & Quality Award, presented by the JC and NQF

14.6%
Decrease in Readmission Rate

Management of approximately
200 episodic groups

Secured **\$17M** in incentive payments since joining the BCPIA model

The Persivia AI engine has been instrumental in our ability to focus on the most critical patient information whether it is identifying COVID patients or alerting physicians to critical gaps in care.
