

Reduce Readmissions by 65%

Powered by Persivia's **Proprietary AI and Patented Technology**

Identify high-risk patients earlier, coordinate care across settings, and prevent avoidable hospital readmissions with Persivia CareSpace®.

How CareSpace® Prevents Readmissions

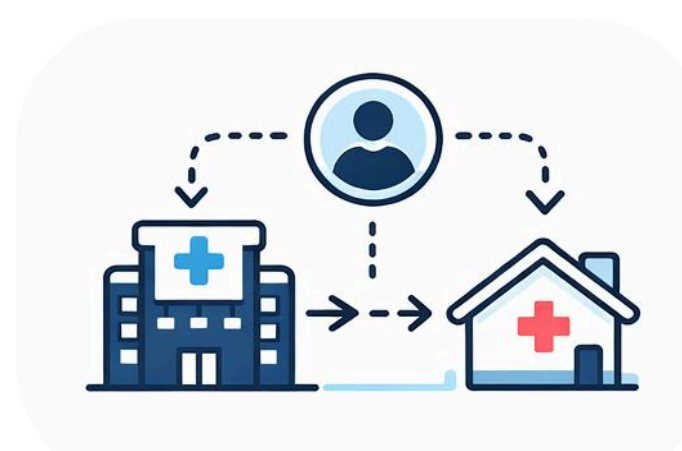

Predict Risk Early

Proprietary AI models analyze clinical, claims, and utilization data to identify patients most likely to be readmitted.

Reduce Costs

Care teams receive intelligent recommendations to ensure discharge plans, medications, and follow-ups are properly coordinated.

Strengthen Transitional Care

CareSpace® supports post-discharge monitoring and follow-up during the critical 30-day window.

Coordinate Care Across Settings

Providers, case managers, and post-acute facilities collaborate through a shared care management platform.
